Subject: Re: Fw: Gulfco Marine Split Soil Sample Results - AST Removal Oversight
Date: 01/28/2011 05:28 PM

Hello, Gary and Dipa!

I have reviewed the Former AST Tank Farm verification sampling results. At six locations, T-6 South, East, and North, T-21-F, T-15-F, and NC-0-0.3 the soil results show contamination above the Comparison Criteria. At Tank 6, Tanks 15 and 21, and NC-0-0.3 locations they need to excavate deeper, collect another set of samples to prove the vertical extent of contamination is assessed. And hope that the vertical extent will not reach the first groundwater horizon.

Thanks!

Dipa & Luda

Our contractor got several sample splits for the soil under the tanks & here are the results; I will be comparing these to the Gulfco results, and would appreciate your looking at this too.

Thanks,

Gary Miller, P.E.

Subject: Gulco Marine Split Soil Sample Results - AST Removal Oversight

Gary:

Attached is a copy of the laboratory report EA received this morning for the split soil samples collected during AST removal oversight activities at the Gulfco site. These results are still subject to validation by EA, but I wanted to go ahead and provide you a copy. I have also prepared a simple summary table that compares the results for the soil samples to the Preliminary Screening Values that PBW developed and presented in their 2005 RI/FS Work Plan, and as a reference to sample locations, also attached PBW's map illustrating the former AST configuration.

Please let me know if you have questions or comments concerning this matter.
